- Connection:** <https://videoconf-colibri.zoom.us/j/83022475461?pwd=ZFZjOGIFUHJwMnZCcHR6ZGdYZXFsZz09>
- Moderator:** Paulo Ávila

**Abstract of the webinar**

Power BI is a business analytics service by Microsoft, maybe the most important in the area. It aims to provide interactive visualizations and business intelligence capabilities with an interface simple enough for end users to create their own reports and dashboards. The extraction of data from business management information systems (such as Primavera, PHC, SAP, AS / 400, etc.) for exploration through Power BI is currently one of the most sought after Business Intelligence options in organizations for analytical purposes.

In this webinar will be shown real application of the Power BI tool at EFACEC, one of the biggest Portuguese companies, and the gains carry out for the company.
